Instantaneous Hot Water On Demand!
No Storage Tanks Required!

The PERFORMA™ Plus High Efficiency Boiler

Below are features of the boiler system made by PROPAK™.

Compact Design • Up to 99.8% Efficiency • All Stainless Construction

Completely assembled, wired, and factory test-fired prior to shipping.

Ultra-High Efficiency means low stack temperature - Sealed Combustion means no ventilation openings to the outside. Both Exhaust and air inlet use PVC pipe.

Modular component construction and self-diagnostic microprocessor controls provide for easy trouble-shooting and maintenance.

Extremely low NOX emissions exceed even pending government standards.
